Intermediate Microsoft Excel 2003

Course length: 16 hours

Course Description: In Introduction to Microsoft Excel, you created, edited, formatted, and printed basic spreadsheets. You now have a need to streamline repetitive tasks and display spreadsheet data in more visually effective ways. In this course, you will use Microsoft® Excel 2003 to streamline and enhance your spreadsheets with templates, charts, graphics, and formulas.

Course Objective: You will apply visual elements and advanced formulas to a worksheet to display data in various formats.

Target Student: The target students for this course are students who desire to gain the skills necessary to create templates, sort and filter data, import and export data, analyze data, and work with Excel on the Web. In addition, this course helps prepare students who desire to prepare for the Microsoft Office Specialist exam in Excel or Module 2 and who already have knowledge of the basics of Excel, including how to create, edit, format, and print basic worksheets.

Fees: \$20

Prerequisites: To ensure your success, we recommend that you have experience with creating, editing, formatting, saving, and printing basic spreadsheets in Microsoft® Excel 2003. Students can obtain this level of skill by taking the Introduction to Microsoft Excel course. In addition, web browsing experience is strongly recommended.

Delivery Method: Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

Courseware: Element K

Certification: This course is one of a series of classes that addresses Microsoft Office Specialist (Office Specialist) skill sets. The Office Specialist program is for individuals who use Microsoft's business desktop software and who seek recognition for their expertise with specific Microsoft products. Certification candidates must pass one or more proficiency exams in order to earn Office Specialist certification.
